

Track Your Water Usage

Use the chart to determine how much water is used.
1 Flush = 5 gallons of water used for flushing

Day	Week 1	Week 2
Day 1		
Day 2		
Day 3		
Day 4		
Day 5		
Day 6		
Day 7		
Total Gallons		

EXAMPLE: If on day 1, you flush the toilet three times, you have to add 5 Gallons three times as shown in the box below. Add up the total amount of Gallons each day. At the end of Day 7, add up all of the days for week 1 together and write the total at the bottom.

Day 1

Example: Week 1

3 Flushes = 1 flush + 1 flush + 1 flush

5 Gallons + 5 Gallons + 5 Gallons

3 Flushes = 15 Gallons
